FLEBOGRIF®

SET FOR VENOUS INSUFFICIENCY TREATMENT

The set for varicose veins treatment Flebogrif is equipped with retractable scratching elements that combine the mechanical and chemical obliteration of the superficial venous trunks. The method consists in a simultaneous mechanical damage of the inner layer of the vein wall and chemical controlled administration of obliterating agent.

Advantages:

- painless outpatient procedure
- no thermal action
- easy to use
- no other medical equipments (except USG) are needed
- quick procedure
- self-expandable scratching elements that adapt to the caliber of the vein
- excellent and long-lasting cosmetic effect
- quick recovery
- no tumescent anaesthesia

Catalogue No.	Catheter size	Catheter length
FLE6F90	6F	90 cm
FLE6F60	6F	60 cm
